## NATO Stability Policing Centre Of Excellence

The NATO Stability Policing Centre of Excellence is NATO accredited authority in the specialty, being acknowledged as a modern, adaptive, cooperative and supportive organization, whose high quality experience and products are requested by a network of customers and partners from within and outside NATO. It is the Alliance’s interface with International Organizations and non-NATO institutions in the area of Stability Policing.

### What is Stability Policing (SP)?

- Within NATO, SP is defined as police related activities intended to reinforce or temporarily replace the indigenous police in order to contribute to the restoration and/or upholding of the public order and security, rule of law, and the protection of human rights.
- SP aims mainly at the establishment of a Safe and Secure Environment (SASE), giving the local population the feeling to be safe protected, and ruled by law, then recognising legitimacy to the law enforcement and finally setting up the conducive conditions for the sustainable stabilization of the area of operations.
- SP requires well equipped and trained military assets in order to address essentially and properly the Host Nation populace and its Law Enforcement Agencies. Those specific NATO military forces are experts in law enforcement and civil policing at the disposal of the NATO Force Commander. After a major conflict or crisis, SP enables the disengagement of combat military forces while NATO is increasing the stabilization of the area.
- More details could be read in the AJP-3.22, which is the NATO strategic publication that deals with SP.
